

Management Discussion & Analysis (“MD&A”)

For the Year Ended June 30, 2022

(All amounts expressed in Canadian dollars)

XPLORE RESOURCES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

This Management Discussion & Analysis (“**MD&A**”) provides a detailed analysis of the business of Xplore Resources Corp. (the “**Company**” or “**Xplore**”) and describes its financial results for the year ended June 30, 2022. The MD&A should be read in conjunction with the Company’s audited consolidated financial statements and related notes for the years ended June 30, 2022 and 2021 which have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”). Refer to Note 4 of the audited consolidated financial statements, for disclosure of the Company’s significant accounting policies and a discussion of future accounting policy changes. The Company’s reporting currency is the Canadian dollar and all amounts in this MD&A are expressed in the Canadian dollar, unless otherwise stated. Information contained herein is presented as of October 27, 2022, unless otherwise indicated.

Management’s Responsibility

The Company’s management is responsible for the preparation and presentation of the consolidated financial statements and the MD&A. The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board. This MD&A has been prepared in accordance with the requirements of securities regulators, including National Instrument 51-102 – *Continuous Disclosure Obligations* (“**NI 51-102**”) of the Canadian Securities Administrators.

Cautionary Statement on Forward-Looking Statements

This MD&A contains certain “forward-looking information” and “forward-looking statements” (collectively referred to herein as “**forward-looking statements**”). These forward-looking statements relate to future events of the Company’s future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “continues”, “forecasts”, “projects”, “predicts”, “intends”, “anticipates”, or “believes”, or variations of, or the negatives of, such word and phrases, or state that certain actions, events or results “may”, “could”, “would”, “should”, “might”, or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement.

These forward-looking statements include the Company’s expectations as to, but are not limited to, comments regarding the timing and content of upcoming work programs and exploration budgets, geological interpretations, receipt of property titles, and potential mineral recovery processes. The material factors and assumptions used to develop the forward-looking statements contained in this MD&A include the following: approved budgets, exploration and assay results, results of the Company’s planned exploration expenditure programs, estimated drilling success rates and other prospects. Due to the nature of the mineral resource industry, budgets are regularly reviewed in light of the success of the expenditures and other opportunities that may become available to the Company. Accordingly, while the Company anticipates that it will have the ability to spend the funds available to it, there may be circumstances where, for sound business reasons, a reallocation of funds may be prudent.

Readers are cautioned that the foregoing list of important factors and assumptions is not exhaustive. Forward-looking statements are not guarantees of future performance. Events or circumstances could cause the Company’s actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. The Company undertakes no obligation to update publicly or otherwise

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

Factors that could cause results or events to differ materially from current expectations expressed or implied by the forward-looking statements, include, but are not limited to, factors associated with fluctuations in the market price of minerals, mining industry risks and hazards, environmental risks and hazards, economic and political events affecting metal supply and demand, uncertainty as to calculation of mineral reserves and resources, requirement of additional financing, and other risks. Actual results may differ materially from those currently anticipated in such statements.

Risks and Uncertainties

The Company does not currently own any cash generating assets. The Company will be reliant on equity and debt financing in order to meet current and future obligations, exploration and evaluation expenditures, and ongoing operating costs. These additional funds may not be available on terms acceptable to the Company, or at all.

During the first quarter of calendar 2020, there was a global outbreak of a novel coronavirus identified as “COVID-19”. On March 11, 2020, the World Health Organization declared a global pandemic. In order to combat the spread of COVID-19, governments worldwide have enacted emergency measures including travel bans, legally enforced or self-imposed quarantine periods, social distancing and business and organization closures. These measures have caused material disruptions to businesses, governments and other organizations resulting in an economic slowdown and increased volatility in national and global equity and commodity markets.

Central banks and governments, including Canadian federal and provincial governments, have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of any interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company and its operations in future periods.

Overview of Performance and Operations

Xplore was incorporated on February 24, 2017 pursuant to the Business Corporations Act of British Columbia and was classified as a Capital Pool Company as defined in the TSX Venture Exchange (“TSX-V”) Policy 2.4. On October 30, 2017, the Company completed its Initial Public Offering (“IPO”) and the Company’s shares commenced trading on the TSX-V.

On September 23, 2019, the Company incorporated a wholly owned subsidiary, 2717915 Ontario Inc., under the *Business Corporations Act* (Ontario). This subsidiary was incorporated solely for the purpose of completing the Company’s qualifying transaction under TSX-V Policy 2.4.

Xplore Resources Holdings Corp. (formerly Xplore Resources Corp.) (“Xplore Holdings”) was incorporated on May 28, 2018 under the Business Corporations Act of Ontario. On October 6, 2020, the Company acquired Xplore Holdings.

XPLORE RESOURCES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

The head office, principal address, and records and registered address of the Company are located at 4400-181 Bay Street, Toronto, Ontario, Canada, M5J 2T3. The Company's principal business activities include the acquisition and exploration of mineral properties prospective for gold and copper mineralization in the Americas.

Acquisition of Xplore Holdings

On October 6, 2020, the Company closed its arm's length qualifying transaction (the "QT"), by acquiring all of the issued and outstanding shares of Xplore Holdings, in exchange for shares of the Company. Pursuant to the terms of an amalgamation agreement dated February 13, 2020 among the Company, 2717915 Ontario Inc. ("VON Sub", a private Ontario company and a wholly owned subsidiary of the Company), and Xplore Holdings, a private Ontario corporation, the following was completed during the year ended June 30, 2021:

- a) VON Sub and Xplore Holdings amalgamated and became a wholly owned subsidiary of the Company;
- b) the Company issued 26,680,000 common shares to the shareholders of Xplore Holdings on a one for one basis; and
- c) the Company changed its name from VON Capital Corp. to Xplore Resources Corp.

As a result of the QT, the former shareholders of Xplore Holdings own in excess of 50% of the outstanding shares of the amalgamated entity. For accounting purposes Xplore Holdings is considered to be the accounting acquirer and therefore, the corporate merger has been accounted for as a reverse takeover. For financial reporting purposes, the Company is considered a continuation of Xplore Holdings, the legal subsidiary, except with regard to authorized and issued share capital, which is that of the Company, the legal parent. Consequently, comparative amounts, prior to the completion of the QT in the consolidated financial statements are those of Xplore Holdings only.

Mineral Property Assets – Valk Property (Cu, Au, V)

On September 30, 2019, the Company finalized an asset purchase agreement (the "Asset Purchase Agreement") with Longford Capital Corp., a corporation incorporated under the laws of the Province of British Columbia ("Longford" or the "Vendor"), and James Douglas Rogers to acquire a 100% right over specific mineral claims located in a 1,614 hectare ("ha") area within the Nanaimo Mining Division centred at approximately 127° 43'W longitude, 50° 47'N latitude, British Columbia, and approximately 27 kilometres northwest of Port Hardy (the "Valk Property"). The Asset Purchase Agreement was amended on February 7, 2020 and again on November 2, 2020 (the "Amended Agreement") such that the Company acquired a 100% interest in the Valk Property by making the following cash payments and share issuances:

- a) a cash payment of \$50,000 (paid September 2019);
- b) a cash payment of \$100,000 (paid November 2020);
- c) issuance of 1,500,000 common shares (issued September 2019); and
- d) issuance of 1,000,000 common shares (issued November 2020).

After making the cash payments and completing the share issuances noted above, the Company has no further commitments of minimum exploration expenditures, no future cash payments, and no further share issuances per the Amended Agreement.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

The Company entered into a finder's fee agreement on February 13, 2019 which was further amended on October 26, 2020 (the "Finder's Agreement"). Pursuant to this Finder's Agreement, the Company made a payment of \$5,000 cash, issued 150,000 common shares (issued September 2019), and made a final payment of \$5,000 cash. There are no further payments owing under the Finder's Agreement.

The Company has granted a 2% Net Smelter Return ("NSR") Royalty which is effective on all future production from the Valk Property. The Company may buy back half (1%) of the Royalty, at any time, for a fixed cost of \$1,500,000.

Exploration - Valk Property

The 1,614 ha Valk Property is situated in northern Vancouver Island, a region prospective for copper and gold mineralization. The Valk Property is dominated by rocks of the Karmutsen Formation, known to host anomalous copper mineralization. Regional scale faults trend in a north-easterly direction across the Valk Property. These faults can be traced to the Island Copper Mine, a porphyry copper, gold molybdenum deposit that operated from 1971 through 1995, producing over 1.2 million tonnes of copper and 1.2 million ounces of gold. Mineralization at the Island Copper Mine was closely associated with rocks of the Island Plutonic Suite which are mapped 3.0 kilometres to the south west of the Valk Property.

A technical report titled Technical Report on the Valk Property with an effective date of March 6, 2021, prepared under the supervision of Warren Robb, P.Geo., is available on the Company's website and is filed on SEDAR for reference.

In Q2-2021, the Company commissioned Longford Exploration Services Ltd. ("Longford") to conduct prospecting and geochemical sampling through the central portion of the Property where road construction had exposed mineralized outcrop not previously sampled and where historical geochemical soil sampling indicated gaps in the coverage. Longford's 2021 field work included:

- a) 673 surface soil samples;
- b) 50 rock samples;
- c) 63 chip-grab samples and
- d) 6.0 metres of channel rock samples.

Longford prepared an Assessment Report titled "Assessment Report on the Valk Property" with an effective date of May 9, 2022 which was submitted to the British Columbia Ministry of Energy, Mines and Low Carbon Innovation seeking an assessment credit of C\$105,620. Assessment credits attributed against the Valk claims are sufficient to maintain the claims in good standing to October 29, 2028.

As at the date of this report, the Valk database includes:

- e) 2,801 surface soil samples;
- f) 108 rock samples;
- g) 63 chip-grab samples and
- h) 23.0 metres of channel rock samples.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

Exploration to date at the Valk Property has identified anomalous copper, gold and vanadium mineralization in soil, rock and stream sediments. Anomalous copper (>50 ppm), vanadium (>500 ppm) and gold (>10 ppb) define a northeast trend extending for over 3.0 kilometres along strike across a 1.0 kilometre width. The north-east trend is coincident with regional scale faulting which traces directly to the Island Copper Mine, a former producing mine approximately 20 kilometres to the southeast.

The source of the copper mineralization is currently unknown. The Company believes that the copper mineralization may be related to a buried intrusive complex and that the Valk Property may be prospective for both copper-gold porphyry and epithermal gold mineralization.

The Company has incurred the following cumulative expenditures on the Valk Property:

	Opening Balance		Ending Balance
	June 30, 2021	Additions	June 30, 2022
Acquisition Costs			
Option payments - cash	\$ 150,000	\$ -	\$ 150,000

Mineral Property Assets – Upper Red Lake Property (Au)

On February 5, 2021, the Company signed a property acquisition agreement with Abitibi Royalties Inc. ("Abitibi") whereby the Company may acquire a 100% interest in the 1,750 Ha Upper Red Lake Gold Project (the "Upper Red Lake"), located in the Red Lake Mining Division, ON, Canada by completing the following terms:

- a) The Company obtaining all necessary approvals from the TSX-V (received);

XPLORE RESOURCES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

- b) The Company issuing Abitibi 1,096,491 common shares valued at \$62,500 based on the daily volume weight averaged (the "VWAP") price of the Company's shares as reported by the TSX-V, for the 14 day period preceding execution of the LOI (issued);
- c) On or before February 4, 2022, the Company shall issue to Abitibi \$125,000 in common shares of the Company based on the VWAP price of the Company's shares as reported by the TSX-V, for the 14 day period either 1) execution of the anniversary date or 2) an accelerated date to be determined at the sole discretion of the Company. On February 3, 2022, in exchange for the issuance of an additional 227,272 common shares, Abitibi has agreed to extend this date by six months, and subsequent to year end, extended this date by an additional six months;
- d) On or before February 4, 2023, the Company shall issue to Abitibi \$150,000 in common shares of the Company based on the VWAP price of the Company's shares as reported by the TSX-V, for the 14 day period preceding either 1) execution of the anniversary date or 2) an accelerated date to be determined at the sole discretion of the Company;
- e) The Company agrees to complete sufficient exploration work on the property to maintain the claims in good standing by incurring minimum exploration expenditures of \$35,200 on or before October 7, 2022 (completed); and
- f) On completing the share issuance obligations, the Company shall have earned a 100% interest in the Upper Red Lake minus a 1.5% net smelter return ("NSR") on any future metal production from the Upper Red Lake.

Exploration - Upper Red Lake Property

The Upper Red Lake Gold Project consists of 12 contiguous mineral claims (1,750 ha) located in the Birch-Uchi Greenstone Belt, within the Red Lake Mining Division of Ontario. Glacial till sampling completed by the Geological Survey of Canada in 1991 and 1992, identified pristine gold grains at four locations within the southern portion of the Upper Red Lake property. The anomalous results lie due east of Prosper Gold Corporations ("Prosper") Golden Sidewalk target. Prosper has defined a 3,300 x 500 meter gold in till anomaly that strikes west-northwest and trends onto the Upper Red Lake claims.

In August 2021, the Company contracted ProspectAir Geosurveys to complete a high-resolution, heliborne magnetic ("MAG") survey of the Upper Red Lake claims. A total of 393-line kilometres were completed. Traverse lines were spaced 50 metres apart with control lines spaced every 500m. Flight lines were oriented N126°. Sensor height was 23 metres above ground.

The MAG survey identified six, high priority targets, including a strong, E-W MAG response bracketed by parallel zones of magnetic destruction is observed in the center of the claims and extends over 2,000 metres ("the northern target").

A second, less intense MAG response was returned 2,500 metres to the south ("the southern target", trends northwest and is interpreted to be the continuation of the "Golden Corridor" gold in till anomaly currently being explored by Prosper Gold Corp.), immediately east of the Upper Red Lake claims.

In October 2021, the Company contracted Waldo Sciences Inc. ("Waldo") to conduct initial reconnaissance mapping, rock and glacial till sampling of the two priority MAG targets noted above. Waldo completed a series of N-S reconnaissance lines focused on the two primary targets. Ten (10) glacial till samples were collected at the northern target and nine (9) till samples were collected at the southern target.

XPLORE RESOURCES CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

At the northern target, nine of the ten samples included pristine gold grains suggesting that the source of the gold is proximal to the sample location. Seven of the ten samples collected returned total and pristine gold grain counts within the upper quartile (top 25%) of the regional sample database collected by the Geological Survey of Canada ("GSC"), which contains over 400 regional till samples collected in 1991 and 1992. Gold grades ranged from 13 to 7,834 ppb Au (7.83 g/t Au) and averaged 1,210 ppb Au along an interpreted 2,000 metre strike length.

An additional nine (9) till samples were collected at the southern target area, all but two of which indicate the presence of pristine gold grains suggesting the samples are proximal to the source. The southern MAG target results were generally less robust than the northern target, ranging from 0 to 228 ppb Au with six of the samples containing pristine and total gold grain counts falling with the upper quartile of the GSC sample population.

Thirteen (13) rock samples were collected from outcrop encountered during the reconnaissance traverses. Some of the samples contained visible sulphide mineralization but no significant gold or base metal values were returned.

Waldo noted minimal outcrop in the area with most outcrops identified as mafic metavolcanics, consistent with the regional geological mapping of the Ontario Geological Survey.

Waldo recommended regular spaced glacial till sampling across both primary targets and reconnaissance sampling to investigate the highly anomalous till samples collected by the GSC along a 5.0 kilometre E-W trend parallel to the southern limit of the claims under option.

The Company has incurred the following cumulative expenditures on the Upper Red Lake Property:

	Opening Balance		Ending Balance
	June 30, 2021	Additions	March 31, 2022
Acquisition Costs			
1,096,491 common shares issued at \$0.057/share	\$ 64,020	\$ -	\$ 64,020

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

Mineral Property Assets – Pringle Lake Property (Au)

On February 25, 2021, the Company completed a property acquisition agreement with 1544230 Ontario Inc. and Gravel Ridge Resources Inc. (together the "Vendors") whereby the Company may acquire a 100% ownership interest in 78 contiguous cells (1,560 ha) Pringle Lake Property ("Pringle Lake"), located in the Red Lake Mining Division, ON., Canada by completing the following terms:

- a) The Company obtaining all necessary approvals from the TSX-V (received);
- b) Making a cash payment of \$18,000 to the Vendors on signing of the agreement (paid);
- c) Issuing to the Vendors 90,000 shares of the Company within five days of TSX-V approval of the agreement (issued);
- d) Making a cash payment of \$24,000 and issuing 120,000 shares of the Company to the Vendors on or before February 24, 2022 (paid and issued);
- e) Making a cash payment of \$30,000 to the Vendors on or before February 24, 2023; and
- f) Making a final cash payment to the Vendors of \$30,000 on or before February 24, 2024.

On completion of the above noted cash payments and share issuances, the Company will have earned a 100% interest in the Pringle Lake Property and the Vendors would retain a 1.5% net smelter return royalty ("NSR") on all future metal production. The Company may purchase one half of the NSR for \$600,000.

Exploration Pringle Lake Property

The Pringle Lake Property consists of 78 cells (1,560 Ha) located in the Red Lake Mining Division, ON, Canada. The property is situated along the South Arm structural trend, highlighted in the "2020-2021 Recommendations for Mineral Exploration ~ Ontario" report published by the Ministry of Energy, Northern Development and Mines of Ontario. Recent re-interpretation of historical seismic data suggests potential for a deep tapping seismic structure in the vicinity of the South Arm of Berens Lake. Similar deep tapping seismic structures have been identified proximal to both the Dixie Project and the Red Lake gold mine, approximately 50 kms to the south. Regional scale mapping in 2007 identified favourable host rocks and shearing along the interpreted trace of this third, unexplored, deep tapping seismic system.

In August 2021, the Company contracted ProspectAir Geosurveys to complete a high-resolution, heliborne magnetic ("MAG") survey of the Pringle Lake Property. A total of 345-line kilometres were completed. Traverse lines were spaced 50 metres apart with control lines spaced every 500m. Flight lines were oriented N050°. Sensor height was 25 metres above ground.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

The Company has incurred the following cumulative expenditures on the Pringle Lake Property:

	Opening Balance		Ending Balance

Geophysics	-	35,374	35,374
	-	35,374	35,374
	\$ 25,650	\$ 65,374	\$ 91,024

Mineral Property Assets – Perrigo Lake Property

On August 20, 2021, the Company announced that it had entered into an Option Agreement (the "Agreement") to earn a 100% ownership interest in the 166 contiguous cell claims (3,370 ha) Perrigo Lake Property ("Perrigo Lake") located in the McNaughton Township, Red Lake Mining Division, ON., Canada.

Under the terms of the Agreement, the Company will acquire a 100% ownership interest in Perrigo Lake by completing the following:

- a) the Company obtaining all necessary approvals from the TSX-V (obtained);
- b) making a cash payment of \$18,000 to the vendors on signing of the Agreement (paid);
- c) issuing to the vendors 120,000 shares within five (5) days of TSX-V approval of the Agreement (issued);
- d) making a cash payment of \$20,000 and issuing 120,000 shares on or before September 9, 2022 (completed);
- e) making a cash payment of \$28,000 on or before September 9, 2023; and
- f) making a final cash payment to the vendors of \$30,000 on or before September 9, 2024.

On completion of the above noted cash payments and share issuances, the Company will have earned a 100% interest in Perrigo Lake and the vendors would retain a 1.75% net smelter return royalty ("NSR") on all future metal production. The Company may purchase 0.50% of the NSR for \$600,000. The remaining 1.25% NSR is subject to a pre-existing agreement with an arms-length third party.

Exploration Perrigo Lake Property

The Perrigo Lake property (3,370 ha) is located in the McNaughton Township, Red Lake Mining Division, Ontario. The property is road accessible. The Perrigo Lake claims lies five (5) kilometres due west of the Allison Lake batholith, a focal point for lithium exploration in northwest Ontario. The Company believes that Perrigo offer potential for lithium-cesium-tantalum ("LCT") type pegmatites.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

In August 2021, the Company contracted ProspectAir Geosurveys to complete a high-resolution, heliborne magnetic ("MAG") survey of the Perrigo Lake Property. A total of 740-line kilometres were completed. Traverse lines were spaced 50 metres apart with control lines spaced every 500m. Flight lines were oriented N088°. Sensor height was 22 metres above ground.

Analysis of the airborne dataset identified numerous anomalies within the claim group that warrant follow up evaluation. Anomalies of interest include:

- Target A, a magnetic high response in the center of the claims interpreted to be associated with ultramafic rocks. The contact area between the ultramafics and the metasedimentary rocks to the east may be prospective for gold mineralization;
- Targets B and C – strong, linear magnetic response coincident with felsic volcanics trending NNE along the western boundary of the claims; and
- Target D – a second, strong, linear magnetic response interpreted to be parallel to the contact between the mafic to intermediate volcanic sequence and the metasedimentary rocks that define the eastern boundary of the property.

The Company considers all the identified targets as potentially prospective for gold but notes that the Perrigo block lies approximately 3 kilometres west of the Allison Lake batholith, a primary target of ongoing lithium exploration in the region. The Company believes that Perrigo Lake may offer exploration opportunity for the discovery of lithium bearing pegmatites given its preferential location relative to the Allison Lake batholith.

The Company has incurred the following cumulative expenditures on the Perrigo Lake Property:

	Opening Balance		Ending Balance
	June 30, 2021	Additions	March 31, 2022
Acquisition Costs			
Cash payments	\$ -	\$ 18,000	\$ 18,000
120,000 common shares issued at \$0.075/share	-	9,000	9,000
	-	27,000	27,000
Exploration Costs			
Geophysics	-	45,738	45,738
	-	45,738	45,738
	\$ -	\$ 72,738	\$ 72,738

Surge Property (Li)

On February 18, 2022, the Company entered into an Option Agreement (the "Agreement") to earn a 100% ownership interest in eight (8) unpatented continuous mining claims (3,416 ha) that make up the Surge property ("Surge Property") located in the Patricia Mining District, ON., Canada.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

Under the terms of the Agreement, the Company will acquire a 100% ownership interest in the Surge Property by completing the following:

- a) the Company obtaining all necessary approvals from the TSX-V (obtained);
- b) incurring exploration expenditures in an aggregate amount of \$60,000 on or before the first anniversary;
- c) issuing to the vendors 400,000 shares of the Company (issued);
- d) making a cash payment of \$20,000 to the vendors on signing of the Agreement (paid);
- e) making a cash payment of \$25,000 on or before February 18, 2023;
- f) making a cash payment of \$30,000 on or before February 18, 2024; and
- g) making a final cash payment to the vendors of \$35,000 on or before February 18, 2025.

On completion of the above noted cash payments and share issuances, the Company will have earned a 100% interest in the Surge Property and the vendors would retain a 1.5% net smelter return royalty ("NSR") on all future metal production. The Company may at any time, purchase 0.50% of the NSR for \$800,000. The remaining 1.25% NSR is subject to a pre-existing agreement with an arms-length third party.

Exploration - Surge Property

The Surge property (3,416 ha) is located in the Slate Falls area, Patricia Mining District, Ontario. The property is road accessible.

The Surge property lies within the Pakwash – Lake St. Joseph rare element pegmatite field, an E-W trending, 20 kilometre wide, 100 kilometre long trend containing multiple peraluminous (aluminum rich) granitic intrusions, rare earth pegmatites and lithium bearing pegmatites. The property is 12 kilometres east of the Root Lake pegmatite group which hosts the McCombe lithium deposit (historic mineral resource of 2.3 million tonnes averaging 1.3% Li₂O – Mulligan R. Geological Survey of Canada, 1965). Ardiden (2015) reported 5.0 metres averaging 2.1% Li₂O from continuous channel samples collected in 2016, approximately 5 kilometres west of the property boundary. Historical mapping (1963) identified seven (7) distinct pegmatites, scattered peripheral to a central, east-west trending peraluminous granite that transects the Surge property claims. The Company considers the Surge property to be prospective for LCT type pegmatites.

In June 2022, the Company contracted ProspectAir Geosurveys to complete a high-resolution, heliborne magnetic ("MAG") survey of the Surge Property. A total of 758-line kilometres were completed. Traverse lines were spaced 50 metres apart with control lines spaced every 500m. Flight lines were oriented N179°. Sensor height was 21 metres above ground.

Interpretation of the survey results is currently in progress. The Company is currently attempting to contract a field team to complete reconnaissance mapping of the Surge property to verify the pegmatites identified in the historical mapping and evaluate the perimeter of the mapped peraluminous intrusion for additional pegmatite bodies.

September 30, 2020	\$ -	\$ (12,426)	\$ -	\$ 739,453

All of the Company's mineral property assets are in the exploration and evaluation stage and as such, the Company does not generate any revenues from operations. To date, the Company has been dependent on attaining working capital from the sale of its common shares.

During the quarter ended June 30, 2022, the Company entered into a definitive agreement to acquire a 51% interest in the Diamond Mountain phosphate property from Revival Gold Inc. located approximately 30 kilometres north-east of Vernal, Utah. The agreement called for a non-brokered private placement offering of a minimum of 62,500,000 Units at \$0.08 per Unit for gross proceeds of a minimum of \$5,000,000. The original agreement, as disclosed in our press release of June 6, 2022, was amended August 16, 2022, ultimately expired and the financing did not proceed.

During the quarter ended March 31, 2022, the Company incurred \$83,100 of share-based payments related to acquisition and exploration of properties and grant of stock options.

During the quarter ended December 31, 2021, the Company entered into an agreement to acquire 100% of the issued and outstanding shares of Baru Exploração Mineral Ltda. ("Baru"), a Brazilian based exploration company, for US\$10,000 and the issuance of 500,000 common shares of the Company (shares issued as at year end). The acquisition remains ongoing.

During the quarter ended September 30, 2021, the Company closed a \$355,000 private placement by issuing 3,600,000 flow-through common shares at \$0.10 per share. The Company spent \$77,144 of these flow-through funds on exploration activities during the quarter.

During the quarter ended June 30, 2021, the Company incurred \$68,400 of share-based payments from the grant of stock options, \$39,000 for promotion and marketing, and \$37,416 of professional fees.

During the quarter ended March 31, 2022, the Company was actively engaged in the acquisitions of new mineral properties, including Upper Red Lake and Pringle Lake properties, investing \$88,150 during the quarter and continued the acquisition and evaluation of the Valk property.

XPLORE RESOURCES CORP.
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

During the quarter ended December 31, 2020, the Company completed its QT via the reverse takeover of Xplore Holdings. The acquisition resulted in the Company recognizing a \$365,973 charge for listing expense being the difference between the fair value of the Company's common shares and stock options less its net assets at the date of acquisition. The Company also completed its acquisition of the Valk Property by making cash payments of \$105,000 and issuing 1,000,000 common shares.

During the quarter ended September 30, 2020, the Company completed a non-brokered private placement by issuing 8,080,000 and 500,000 units, respectively, at a price of \$0.10 per unit, for gross proceeds of \$858,000. Each unit was comprised of one common share and one common share purchase warrant exercisable at a price of \$0.15 per warrant.

Significant general and administrative expenditures incurred over the last eight quarters have mostly been marketing costs, professional fees paid for audit and accounting services as well as legal fees incurred for the completion of the QT.

International Financial Reporting Standards – Changes in Accounting Policies

Refer to notes 3 and 4 of the June 30, 2022 audited consolidated financial statements.

Results of Operations

The Company reported a loss of \$196,670 (2021 - \$623,676) and a loss per share of \$0.01 (2021 - \$0.01). Significant components of the loss were:

- Professional fees were \$79,746 (2021 - \$48,750). These fees consisted of accounting and audit fees of \$43,964 (2021 - \$26,214) and legal fees \$35,781 (2021 - \$27,644).
- Promotion and marketing were \$58,419 (2021 - \$105,392). During fiscal 2021, the Company commenced a 12-month promotion and marketing campaign with two independent service providers.
- Consulting fees were \$38,000 (2021 - \$1,210). The 2021 fees were paid to an independent consultant providing management services.
- Other income of \$36,000 (2021 – nil) was the bifurcated value related to a flow-through share premium, recognized as a liability and subsequently recognized as income.
- Share-based payments were \$2,000 (2021 - \$68,400) arising from the grant of 100,000 (2021 - 2,000,000) stock options.
- The 2021 acquisition of Xplore Holdings resulted in nil (2021 - \$365,973) charges for listing expense being the difference between the fair value of the Company's common shares and stock options less its net assets at the date of acquisition.

Financial Condition, Liquidity and Capital Resources

The Company's working capital position as at June 30, 2022 was \$339,433 compared to \$766,156 at June 30, 2021.

Major sources of cash during the year were as follows:

- On July 9, 2021, the Company completed a \$360,000 flow-through share private placement offering by issuing 3,600,000 common shares at a price of \$0.10 per share. \$36,000 was bifurcated as a flow-

MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED JUNE 30, 2022

(All amounts expressed in Canadian dollars, unless otherwise stated)

through share premium, recognized as a liability and subsequently recognized as income. The funds from the flow-through share private placement will be used by the Company to incur Canadian exploration expenses that will qualify as flow-through mining expenditures. As at year end, \$26,467 remains to be spent. The Company paid finders' fees totaling \$5,000 to eligible finders. As of June 30, 2021, the Company had collected \$185,300 of proceeds, the remainder was collected during fiscal 2022.

Major uses of cash during the period were operating activities of \$158,426 and investment in property acquisition and exploration costs of \$395,753.

As the Company does not currently own any revenue generating assets, the Company will need to raise sufficient capital to further explore its properties. At this time, the Company will rely on its current working capital, and its ability to obtain further equity or debt financing for the foreseeable future. Although the Company has been successful in the past in obtaining financing, there is no guarantee that it will be able to obtain adequate financing in the future or that such terms of financing will be advantageous to the Company.

These events and conditions indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

Financial Instruments

Refer to note 11 of the June 30, 2022 audited consolidated financial statements.

Off-Balance Sheet Arrangements

The Company has not engaged in any off-balance sheet arrangements such as obligations under guarantee contracts, a retained or contingent interest in assets transferred to an unconsolidated entity, any obligation under derivative instruments or any obligation under a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to the Company or engages in leasing or hedging services with the Company.

Related Party Transactions

Key management personnel include the Directors, the Chief Executive Officer and the Chief Financial Officer who have the authority and responsibility for planning, directing and controlling of the activities of the Company.

During the year ended June 30, 2022, the Company paid \$nil (2021 - \$1,210) to a Director for consulting fees.

During the year ended June 30, 2021, the Company granted 700,000 stock options, with a fair value of \$25,800, to Directors, the CEO and the CFO. These options expire on May 18, 2024 and have an exercise price of \$0.10.

Outstanding Share Data

The Company had the following securities issued and outstanding:

(1) On September 27, 2022 the TSX Venture Exchange consented to the extension of the expiry term of 8,580,000 warrants which were to expire September 28 and 29, 2022 to September 28 and 29, 2023. The warrants are exercisable at \$0.15.

Directors and Officers

The Company is currently governed by the following members of the Board of Directors:

Wesley C. Hanson	Director and CEO
Charles Edgeworth	Director and CFO
Jamie Hyland	Director
David Patterson	Director
Picklu Datta	Director
Sean Waller	Director

Significant Events Occurring Subsequent to the June 30, 2022 Audited Financial Statements

On December 1, 2021, the Company agreed to acquire 100% of the issued and outstanding shares of Baru Exploração Mineral Ltda. (“Baru”), a Brazilian based exploration company, for US\$10,000 and the issuance of 500,000 common shares of the Company (shares issued as at year end). The transaction remains ongoing and is expected to close in fiscal 2023.

Related to the Upper Red Lake Property, on or before February 4, 2022, the Company was required to issue to Abitibi \$125,000 in common shares of the Company based on the VWAP price of the Company's shares as reported by the TSX-V, for the 14-day period either 1) execution of the anniversary date; or 2) an accelerated date to be determined at the sole discretion of the Company. On February 3, 2022, in exchange for the issuance of an additional 227,272 common shares, Abitibi has agreed to extend this date by six months, and subsequent to year end, extended this date by an additional six months, see Note 6 of the June 30, 2022 audited consolidated financial statements.
